Changing the Face of Public Education to Impact New Realities

A Framework for the Preparation of Highly Effective Educators in The Texas A&M System

- Develop efficient, responsive, and sustainable models for educator preparation
- Design educational leadership programs to meet the needs of public, private, and charter PreK-12 schools with highly skilled leaders.
- Improve PK-6 teaching practices in STEM areas with a focus on mathematics.
- Prepare teacher candidates to teach in a virtual K-12 learning environment.
- Build teacher recruitment programs to attract academically talented and diverse students.
- Develop and strengthen community college, district, regional service center, and other local partnerships.
- Align coursework and programs internally and externally.
- Collaborate on research and development with partnering institutions.

Maximizing Student Achievement & Potential

Highly Effective Educators
