The Texas A&M University System is committed to the recruitment, development and retention of quality teachers in Texas.

In 2012, the Texas A&M System established LearningU to focus on improving student success in PK-12 schools with a focus on STEM teachers, leadership development, and local and regional partnerships.

Of the teacher's produced by the state's four largest university systems, the Texas A&M System produces more than one third. That's higher than any other university system.

Texas A&M System teachers had a 93.68 percent retention rate, as compared to 87.7 percent statewide.
