

# Hot Off The Press

Effective immediately, a new field has been added to the Active Budget Position Maintenance Screen (051) between the ADLOC and the Effective From/Thru dates. This new "Sub" field is used by TimeTraQ and essentially allows a large department to be broken down into smaller "sub" departments.

Currently, the new field is only available for workstation M. When used, the ADLOC/sub-ADLOC combination must exist in the TimeTraQ ADLOC table. For all other workstations this field is protected, and no data entry is permitted.

The addition of this field will make it possible to implement TimeTraQ for a portion of an ADLOC instead of the entire ADLOC.

If you have any questions regarding this change, please contact [bpphelp@tamu.edu](mailto:bpphelp@tamu.edu).
