

Hot Off The Press

Effective Friday, July 14th, there will be a new flag on the Active Budget Position Maintenance Screen. The new flag, **Temp PIN**, will be used to identify PINs that are temporary. PINs that have a **Y** in this field will not be copied from Active to Prep when the budget cycle starts each year and therefore will not be carried through to the new fiscal year's Active Budget.

All PINs will initially have this flag set to **N** at the beginning of each budget year. Any temporary PINs will require you to go in and change this flag to a **Y**.

The **Temp PIN** flag will also be available in the SQL/Access database so you can monitor the temporary PINs you currently have active for your workstation.

If you have any questions, please email to bpphelp@tamu.edu.
