## Revisions for Dependent Data - Screen 115

### Background

Enhanced Help functionality and SSN to UIN changes have been requested for the Dependent Data screens.

### BPP changes

Effective February 15th 2008, Screen 115 will be changed as follows:

1. SSN will be replaced with UIN as the default displayed for the employee and dependents in Inquiry mode. SSN's may be displayed for the employee and dependents (if present) by pressing <F9>.
2. Pressing <F1> in the UIN field will bring up the related Name, Pin, Adloc, SSN, and Employee Status.
3. In Inquiry and Correction mode, <F1> help has been added on the Relation code (Rel column), Certification Type (Rel column), Medicare part code (Medicare column), and the Qualify flag (Qu column).
4. In Correction mode only, <F1> help has been added on the Multiple Birth indicator (MB field) and the Hide Flag (HD field).

### BPP Screen Samples
