SECTION 1 - INTRODUCTION

1.1 Scope

The Texas A&M University System (“A&M System”) is seeking proposals to select one or more vendors to provide a virtual conference software system and event management services (“Solution”) to support its member universities and state agencies (“Member” or “Members”) as described in Section 3 below. The Solution must meet the business needs for both a conference delivery platform and planning and conference facilitation services.

It is the intent of the A&M System to establish a master services agreement (“Agreement”) with one or more vendors to meet the needs of its Members. Any resultant Agreement will be between the selected vendor(s) (“Respondent”) and the A&M System. Each Member at its discretion may choose to utilize the Solution from any resultant Agreement. Execution of an Agreement as a result of this RFP does not guarantee utilization of any Solution offered.

By submitting responses, each Respondent certifies that it understands this RFP and has full knowledge of the scope, nature, quality, and quantity of the work to be performed, the detailed requirements of the services to be provided, and the conditions under which the services are to be performed. Each Respondent also certifies that it understands that all costs relating to preparing and responding to this RFP will be the sole responsibility of the Respondent.

1.2 Background

The Texas A&M University System is one of the largest systems of higher education in the nation with a budget of \$6.3 billion. The System is a statewide network of 11 universities; a comprehensive health science center; eight state agencies, including the Texas Division of Emergency Management; and the RELLIS Campus. The Texas A&M System educates more than 151,000 students and makes more than 22 million additional educational contacts through service and outreach programs each year. System-wide, research and development expenditures exceeded \$1 billion in FY 2019 and helped drive the state’s economy. More information about the A&M System and all of its members can be found at <http://www.tamus.edu/about/>.

1.3 Priorities/Expectations

Respondents should note the following priorities/expectations with regard to the possibility of A&M System establishing a contractual relationship with any Respondent:

- (a) *Ensuring a Quality Level of Service.* This priority encompasses the quality of the level of service that can be provided to all A&M System customers in a timely, cost effective manner. A&M System is seeking a Respondent that will ensure the provision of such quality in its delivery of service through proven training techniques and established metrics.
- (b) *Level of Experience and Expertise.* Respondent must demonstrate its capabilities in providing the utmost level of experience and expertise to ensure a successful solution as determined by A&M System. Respondent shall provide information describing the RESPONDENT’S managed services and project execution experience, including the experience of the resources, account managers, and other key personnel on similar engagements, including past experience within The A&M System.
- (c) *Delivery Efficiency as it Relates to Total Costs.* Respondent must demonstrate its ability to deliver the required solution in a cost-effective and timely manner while not sacrificing the quality required by The A&M System.

2.6 Selection Process

A&M System will base its choice on criteria to include but not limited to the following: demonstrated competence, knowledge, and qualifications of the Respondent in respect to the Solution offered; as well as the capability of the Solution offered to include, but not be limited to, factors such as functionality and ease of use of the Solution; and on the reasonableness of the proposed fee for the Solution and related services.

The Respondent(s) selected will be the one whose experience and qualifications, as presented in response to this RFP, establish them, in the opinion of A&M System, as well qualified and offering the greatest benefits, experience and value to A&M System. A&M System may cancel this RFP or reject proposals at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed to be the most advantageous. Should A&M System determine in its sole discretion that only one Respondent is fully qualified, or that one Respondent(s) is clearly more highly qualified than the others under consideration, a contract may be negotiated and executed with that Respondent. The contract will be an agreement incorporating by reference all the requirements, terms and conditions of the solicitation and the Respondent's proposal as negotiated.

The most qualified Respondents as determined by A&M System MAY BE REQUIRED to present the Solution proposed to the evaluation committee before the final selection(s). Presentations/demonstrations may be presented on-site at an A&M System location or virtually using webinar software. A&M System will not provide compensation to Respondents for any expenses incurred by the Respondent(s) for proposal preparation, evaluations or demonstrations that may be made.

Submission of proposals indicates Respondent's acceptance of the evaluation techniques and the recognition that subjective judgments must be made by A&M System during the evaluation process.

The selection of the successful proposal may be made by A&M System on the basis of the proposals initially submitted, without discussion, clarification, or modification. In the alternative, selection of the successful proposal may be made by A&M System on the basis of negotiation with any of the Respondents. A&M System shall not disclose any information derived from the proposals submitted by competing Respondents in conducting such discussions.

All proposals must be complete and convey all of the information requested to be considered responsive. If a proposal fails to conform to the essential requirements of the RFP, A&M System alone will determine whether the variance is significant enough to consider the proposal susceptible to being made acceptable, and therefore a candidate for further consideration, or not susceptible and therefore not considered for award.

A&M System may perform reference checks and seek further information, as needed from all Respondents whose proposals A&M System, at its discretion, considers viable, based on the initial evaluation and scoring. The Respondent's response to this requirement officially authorizes A&M System to contact these organizations to discuss the services and other considerations which the Respondent has provided to such organizations and authorizes the organizations to provide such information to A&M System and Respondent shall and hereby does release and hold harmless A&M System, the state of Texas, and such organization of any and all liability whatsoever, in connection with providing and receiving all such information. Any negative responses received from reference checks may be grounds for disqualification of the proposal.

4.6 HUB Subcontracting Plan

It is the policy of the state of Texas and the A&M System to encourage the use of Historically Underutilized Businesses (HUBs) in our prime contracts, subcontractors, and purchasing transactions. The goal of the HUB program is to promote equal access and equal opportunity in A&M System contracting and purchasing.

Subcontracting opportunities are possible for this RFP and therefore a HUB Subcontracting Plan (HSP) is **required**. Failure to submit a comprehensive, acceptable HSP will be considered a material failure to comply with the requirements of the RFP and will result in rejection of the submittal. The HUB Subcontracting Plan shall be submitted **with** the RFP response by the date and time specified.

Based on the scope of this RFP, Respondents must determine if they can perform the entire scope with their own resources or if it will be necessary to subcontract any portion of the scope. Subcontracting opportunities are defined as those opportunities contracted with a vendor to provide services, supply commodities, or contribute toward completing work for a governmental entity.

The HUB participation goal for this RFP is 11% for Other Services and every effort should be made to achieve this level of participation through subcontracting opportunities, mentor protégé relationships, or other relationships with the objective of increasing HUB utilization. Maximizing HUB participation is of the utmost importance to The Texas A&M University System.

Complete the HSP as found at <https://www.tamus.edu/business/hub-procurement/hub-programs-3/system-offices-hub-program/> and submit it with the RFP response. If there are pre-existing agreements in place with companies who will be hired as subcontractors, the Respondent will show those vendors as subcontractors on the HSP and provide an explanation as to why solicitations were not done, e.g. contractual requirements. If no pre-existing agreements with companies who will be hired as subcontractors exist, then the Respondent will be expected to make a good faith effort according to the HSP instructions. Don't forget to include any backup documentation and sign the HSP form.

For information regarding the HUB Subcontracting Plan requirements, please contact Keith Williams from the A&M System's HUB Program at (979) 458-3265 or soprocurement@tamus.edu for assistance in determining available HUB subcontractors and proper completion of the HSP. Respondents have the opportunity to submit a draft of the HSP prior to submittal of their response to the RFP for review by Mr. Williams.
