

THE TEXAS A&M UNIVERSITY SYSTEM

Maj. Gen. (USAF, Ret) Timothy S. Green

Director
**The George. H.W. Bush Combat Development
Complex**

Major General (Ret.) Tim Green became Director of the George H.W. Bush Combat Development Complex (BCDC) on March 21, 2022, after serving the Texas A&M Engineering Experiment Station (TEES) as Strategic Advisor for National Security Initiatives at the Center for Infrastructure Renewal (CIR) the previous three years. He joined TEES following over 30 years of service in the United States Air Force, where his final position was the Director of Civil Engineers at Headquarters Air Force in Washington, DC. In that capacity he supported 51,000 military and civilian engineers, enabling military operations at 183 bases around the world.

Tim is a results-oriented executive with demonstrated success in managing large-multidisciplinary organizations. During much of his final 16 years in the Air Force he was responsible for overall strategy, and technical and financial performances of various organizations and specialty areas. Immediately upon joining TEES he led the proposal development team, that within three months, established the initial \$65M five-year Cooperative Agreement between Texas A&M University System (TAMUS) and the United States Army Futures Command. This agreement is the cornerstone for the creation of the BCDC.

Tim holds the following academic credentials: B.S., Civil Engineering (Texas A&M University [TAMU]); M.S., Civil Engineering (TAMU); M.A., Military Operational Art (Air Command and Staff College/Air University); M.A., National Security Strategy (National War College/National Defense University).
